5. Functional groups can modify the properties of organic molecules. In the following table, indicate whether each functional group is polar or nonpolar and hydrophobic or hydrophilic. Which of these functional groups are found in proteins and lipids?

Functional group	Polar or nonpolar	Hydrophobic or hydrophilic	Found in all proteins	Found in many proteins	Found in many lipids
—ОН					
CH <sub>2</sub>					
—СООН					
—NH <sub>2</sub>					
—SH					
—PO <sub>4</sub>					

6. You want to use a radioactive tracer that will label only the protein in an RNA virus. Assume the virus is composed of only a protein coat and an RNA core. Which of the following would you use? Be sure to explain your answer.

a. Radioactive P

b. Radioactive N

c. Radioactive S

d. Radioactive C

- 7. Closely related macromolecules often have many characteristics in common. For example, they share many of the same chemical elements and functional groups. Therefore, to separate or distinguish closely related macromolecules, you need to determine how they differ and then target or label that difference.
  - a. What makes RNA different from DNA?
  - b. If you wanted to use a radioactive or fluorescent tag to label only the RNA in a cell and not the DNA, what compound(s) could you label that is/are specific for RNA?
  - c. If you wanted to label only the DNA, what compound(s) could you label?

8. Based on your answers to questions 1–7, what simple rule(s) can you use to identify the following macromolecules?

Carbohydrates	
Lipids	
Proteins	·
Nucleic acids	
DNA versus RNA	

## Part B. Carbohydrate, lipid, protein, or nucleic acid? Name that structure!

Based on the rules you developed in Part A, identify the compounds below (and on the following page) as carbohydrates, lipids, amino acids, polypeptides, or nucleic acids. In addition, indicate whether each is likely to be polar or nonpolar, hydrophilic or hydrophobic.

1) 
$$C_{17}H_{35}COOH + H-O-C-H \rightarrow C_{17}H_{35}COO-C-H + H-O-C-H \rightarrow C_{17}H_{35}COO-C-H + C_{17}H_{35}COO-C-H$$

2) 
$$HC = C - CH_2C - COOH$$
